KEEP OUT OF REACH OF CHILDREN.

Methylfolate
800 mcg DFE
Cherry Flavored

HELPS SUPPORT NERVOUS SYSTEM AND CARDIOVASCULAR HEALTH†

Dietary Supplement
60 Lozenges

SUPPLEMENT FACTS
Serving Size 1 Lozenge

Amount Per Serving	% Daily Value
Folate 800 mcg DFE (as Calcium L-5-Methyltetrahydrofolate [5-MTHF]) (Magnafolate®©)	200%

Other Ingredients: Fructose, sorbitol, cellulose gum, natural cherry flavor, vegetable stearin, carmine, luo han guo fruit, silica, mannitol and dextrose.

Methylfolate (5-MTHF) is the most biologically active form of folate in the human body. Unlike folic acid, it needs no enzymatic conversion within the body, and is therefore six times more bioavailable.

Many people suffer from a genetic disorder that prevents them from adequately converting folate into 5-MTHF. Since it does not require conversion, supplemental 5-MTHF quickly increases both blood and cellular levels of this critical nutrient†.

In addition to its well-known role in supporting healthy fetal neural development, 5-MTHF is important in the synthesis of acetylcholine, an important neurotransmitter. 5-MTHF also supports a healthy cardiovascular system by helping to keep homocysteine levels within the normal range. Homocysteine is a known risk factor for cardiovascular disease.†
