

Studies show the Ubiquinol form of CoQ10 is absorbed more efficiently and offers enhanced bioavailability over other forms of CoQ10 (ubiquinone). Age and health status significantly affect the body's ability to manufacture ubiquinol from the ubiquinone form of CoQ10. Providing an oral supplement of this powerful antioxidant can help the body maintain optimal levels despite age and/or health status. Cocrysta™ Ubiquinol is produced through a patented process that stabilizes this reduced form of CoQ10 against oxidation. †
